EDUCATION

Bachelor of Information Technology

La trobe University

2015 – 2017

PROJECTS

AFL Tipping System

La trobe University

Achievements/Tasks

- A tipping competition system developed primarily for behavioural analysis. This system has two main subsystems one facilitating a tipping competition and the other calculates the probability of each team qualifying for the play-offs as they progress through the season.

PERSONAL PROJECTS

Intelligenttravel

- A hotel & flight meta-search engine hosted by third party.

YeezySupply Bot

- Keeps track of limited edition & luxury shoes by monitoring hundreds of websites and it notifies the user when they are released or available.

Rust Clan Finder

- Extension System for a PC game (RUST) allows users to create clans, add members to their clan, specify roles, manage members etc., with a score system which allows different clans to compete with each other for domination.

VOLUNTEER EXPERIENCE

Help Desk

La trobe Melbourne

Tasks

- Provided support for new foundation & diploma students to get registered, get their student IDs.

Registration & Information Desk

La Trobe University Soccer Club

Tasks

- Helped promoting the club and registering new players
